Branching Out Artistree creates unique handcrafted furnishings which are inspired by nature. The natural form of branches and the beauty of wood slabs combine to make functional art. As founder of Branching Out Artistree, I have been working with wood for 19 odd years & until recently I was making traditional square furnishings. I love the outdoors, and on my many walks I was inspired to find a way to recycle the many fallen branches that littered the ground. When I used some of the branches as table legs, I noticed the table was very sturdy, naturally balanced and aesthetically pleasing. They seemed to take on their own personality.

The surfaces of my furnishings are hardwood slabs up to 2 inches thick consisting of oak, beech, walnut, cherry, ash and other local hardwoods that are slowly dried to prevent cracking. They are finely sanded to reveal the natural grains and colors of each piece. Sealer is then applied before the final finishes which are shellac or oil.

I reassemble the tree creating functional art in the form of tables, shelves, modular entertainment units, cd towers, and games tables. Each piece made is unique and may be designed to suit a variety of settings from contemporary to comfortable cottage decor.
